

PLEASE PRINT AND DISTRIBUTE FLYERS TO PRINCIPALS,
COUNSELORS, SCHOOL TO CAREERS COORDINATORS, 8TH AND
9TH GRADE TEACHERS, PTO REPRESENTATIVES

Register at our website www.schooltoworld.org

School to World is an opportunity for business, government, and education to partner to help 8TH and 9th students explore careers and encourage them to stay in school.

The twelfth annual **School to World** career exploration event will be held **Saturday, February 12, 2011**, at the Albuquerque Convention Center from 9:00 a.m. – 1:00 p.m. It was very successful last year with over 2000 students participating from all over the state. Students, parents, and teachers will have the opportunity to talk to **representatives from over 150 careers and institutions of higher learning**.

We hope you will be **enthused** about this event and **support** and **promote School to World** at your school. Check out our website at schooltoworld.org. If you have questions, email Kay Provolt at kandgp@comcast.net or Darline Polonis at Sandia National Laboratories, dpoloni@sandia.gov

After we have received your registration form, we will follow up with a confirmation packet in late January that includes directions, posters, and communications that are to be sent home to parents or used in newsletters. **APS is providing free buses once again for APS mid schools** and the information to sign up will also be included in that packet you receive in late January.

We look forward to your participation!

Sincerely,

School to World Committee

How does School to World align with the Standards?

- Students will identify their career interests and aptitudes to develop an educational plan which supports personal career goals.
 - Explore areas of interest and possible career choices
 - Understand the structure and function of business ownership in the United States, New Mexico, and local economies.
- Students will utilize and manage resources effectively to produce quality services and products.
 - Determine the education and training requirements for careers identified as possible areas of interest.
- Students will demonstrate the technological knowledge and skills required for future careers.
